Attention: Jim D'Alexander

Subject: Professional Tree Survey of the Indian Lakes Resort Property,  
Bloomingdale, DuPage County, Illinois  
(Bollinger Environmental Project Number 027-079-17)

Dear Mr. D'Alexander:

As requested on June 27, 28, and 30, and July 3 and 6, 2017, Bollinger Environmental, Inc. (BEI) staff tagged and identified all trees greater than or equal to 6" diameter at breast height (DBH) on site and identified trees 50' beyond the property limits per the Bloomingdale Village Code, Title 8, Chapter 16. Please note, on-site trees were tagged and off-site trees were sketched on aerials.

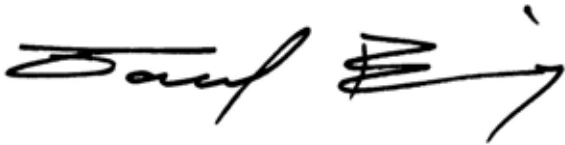

The Tree Inventory Report lists: tag number, common name, scientific name (genus and species), size, condition, form and general comments regarding the quality of the identified trees. Twelve hundred and sixty seven (1,267) trees were identified. Please note two tree tags were missing (tag numbers 1101 and 1526). Our on-site tag numbers ranged from 1001 to 2078 and will be located by your office. Off-site trees were not tagged however their general locations were sketch on aerials where we used numbers 1 to 192. These off-site trees will also be located by your office. We used common name and scientific name (genus and species) using nomenclature from *Flora of the Chicago Region, A Floristic and Ecological Synthesis*, by Wilhelm and Rericha (2017). During the survey, each tree was evaluated and assigned a number rating based on a scale rating from 1 – 5. The following discusses the rating scale in the Condition/Form column of the Tree Inventory Report. These ratings are established and based on general observations at the time of the inventory. A rating of 1 (excellent) will have the highest value in terms of protection or preservation. A rating of 5 (worst) will have the lowest value and quality. For example:

- A. (1 = excellent condition) A rating of 1 would be given to a tree that is excellent in appearance, condition and form, having a well-developed root system, balanced branching and healthy.
- B. (2 = above average) A rating of 2 would be given to a tree that has little to no damage, fairly straight, sound, good shape and form, and is good in overall physical quality.

- C. (3 = typical condition) A rating of 3 would be given to a tree that is average in condition, form, physical state, appearance, and health.
- D. (4 = poor condition) A rating of 4 would be given to a tree that has some deadwood, minor sweep or lean, distorted shape, trunk or bark damage, multi-stems, poor physical quality.
- E. (5 = poor/worst condition) A rating of 5 would be given to a tree with a lot of deadwood, bad sweep or lean, diseased or damaged by insect pests and larvae, lightning damage, split, or other physical damage. This would also be given to a tree that was so damaged death is inevitably close

Please contact me with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul Bollinger". The signature is written in a cursive style with a large, stylized initial "P".

Paul Bollinger, PWS  
President/Ecologist  
BOLLINGER ENVIRONMENTAL, INC.

## TREE SURVEY

**SITE** Indian Lakes, Bloomingdale, DuPage County, IL

**DATE:** June 27, 28, 30 and July 3 & 6, 2017

**NOTE:** Trees 1 - 192 represent off-site trees (see marked up aerial for locations) and Trees 1001 - 2078 represent tree tag numbers for on-site trees.

**CLIENT:** Manhard Consulting

Tree #	DBH (inches)	Scientific Name	Common Name	Condition (1-5)	Form (1-5)	Notes
