

CONCRETE WASHOUT INFORMATION

Effective concrete washout areas are **used to contain concrete slurry and liquids** when the chutes of concrete mixers and hoppers of concrete pumps are rinsed out after delivery to a site. The washout facilities are used to consolidate solids for easier disposal or reuse and to prevent runoff of contaminated liquids.

4' x 4' construction washout portable fiberboard system

The 4'x4' concrete washout box from Outpak is designed for easy setup while still allowing for at least 10 concrete washouts. Keep your construction site eco-friendly and EPA compliant and use this construction washout also for, paint washout, stucco washout, and more.

Setup and disposal are easy

The unit ships flat so it is portable and easy to take anywhere, when you are ready to use simply unfold the water treated Kraft fiberboard on a pallet and line with the included 6mL bag. When the washout is full let it dry till it becomes solid and then the entire washout can be disposed of in any trash location, if you need the material to dry quicker use the optionally purchased Outpak Slurry Solution Solidifier to harden the material quickly.

Be in EPA compliance

EPA fines can be staggering at your job site if you are not properly washing out your construction material, be in compliance with the easy to use and set up Outpak 4' x 4' washout system.

EPA regulations: <https://www3.epa.gov/npdes/pubs/concretewashout.pdf>

Specifications

- 350# VC3 water-treated Kraft fiberboard
- Model: 945-123404
- Size: 4' x 4' x 14"h
- Displacement: .69 cubic yards
- Weight dry: 10 lbs
- Includes: One 4' x 4' box and 1 bag to line
- Liner thickness: 6mL
