PLANTING ADDRESS: _____

E-MAIL ADDRESS: _____

INDICATE **QUANTITY** DESIRED
(limit of **one** tree per residential parcel; **two** trees per business/school/commercial parcel)

_____ **American Sentry Linden Princeton (Tiliaceae)**

American Sentry Linden has dark green foliage throughout the season. The large heart-shaped leaves turn an outstanding gold in the fall. It features subtle clusters of fragrant buttery yellow flowers with tan bracts hanging below the branches in early summer. It will grow to be about 50 feet tall at maturity, with a spread of 25 feet.

_____ **Armstrong Gold Maple (Acer rubrum)**

Armstrong Gold Maple is an updated cultivar of 'Armstrong' Red Maple. It has improved, brighter foliage color and more compact branching – 'Armstrong' has a somewhat leggy branching habit. The narrow spread of this tree makes it a popular and versatile choice for small spaces, narrow gardens, and parkways. The Armstrong Gold Maple is a medium-sized deciduous maple, which grows to the height of 40 feet with a spread of 12 feet.

_____ **Ironwood (Betulaceae)**

Ironwood is a tough understory tree with beautiful birch-like leaves, grayish-brown flaky bark, fine-textured drooping branches, and attractive hop-like fruits. Ironwood is considered one of Illinois' toughest native hardwoods and is not only ornamental but resistant to many disease and insect problems. Excellent tree for naturalized landscapes. Its mature size and form are 25 to 40 feet high and 15 to 40 feet wide.

_____ **Redbud (Cercis canadensis)**

A stunning display in April and May, the branches and twigs of a Redbud tree are cloaked in purplish-pink, pea-like blossoms before its leaves open. Its mature size and form are 15 to 20 feet high and 20 to 25 feet wide.

_____ **Serbian Spruce (Picea omorika)**

The most graceful of all spruces, the Serbian Spruce offers thin arching branches with a slender straight trunk. The needles are light-green to blue-green with purple to cinnamon colored 1-1/2 in. cones. Grows 50-60 feet with a 25 ft. spread.

_____ **Sunburst Honey Locust (Gleditsia triacanthos)**

The Sunburst honey locust is native to the midwestern United States where it grows in moist and winter-cold locations. It is a fast-growing tree with an arching branch habit, reaching 35-50 ft. tall, 30-35 ft. wide. The new growth of this cultivar is bright yellow and very attractive.

_____ **Urban Pinnacle Oak (Quercus macrocarpa)**

An impressive variety with its picturesque narrow upright habit of growth and strong central leader; great for landscape or street use; extremely small acorns for a bur oak; very tough and adaptable, disease resistant, heat and drought tolerant. Grows 55 feet high by 30 feet wide.
